

On his 51st anniversary of professional trading **Michael S. Jenkins** has written his day by day, step by step guide to day trading and any other time frame you desire. This is the culmination of his life's work and has just about every single professional tip you will need to precisely time the market every day and also predict the high and low cycles on any stock, commodity, currency, Bitcoin or any other trading vehicle you trade.

## Day Trading For 50 Years

### The Michael S. Jenkins Methods

This book is 195 pages with over 200 exhibits of day by day, bar by bar instructions on how to setup your charts, use of time frames, *scale any chart no matter what* in only about 30 seconds and that scale will be absolutely perfect all the time on any time frame, and your trendlines based on that particular scale will always work. You will learn how to obtain the exact internal time cycle for each chart and each time frame so you can predict highs and lows usually within a bar or two, even out to many months into the future. You will also learn how to factor in the specific support and resistance for any stock or commodity and also key trendlines you can trade against with almost absolute certainty that the trend will last until that trendline is broken and then where will the next drop land. You will learn about strategy, options trading, the secret of 'Squaring the Circle' and PI, and my proprietary Arc Vector method not even revealed in its entirety in my \$6,500

weekend seminars which I use every day to make highly accurate option trades predicting to the hour the highs and lows. This even works on the one minute charts on futures and currencies and you will see dozens of examples of such. In short I have compiled and condensed 50 years of 18 hour days of practical trading and study, with the sole goal of showing you how to make money every single day of your life.

### **Who Is This Book For?**

This book is a complete guide in a step by step fashion so that the beginning student just starting out or the advanced trader with 15 or more years professional trading will both be able to learn much and utilize the methods in this book. Almost all of these methods are proprietary and discovered by myself so you can know you have never seen them before except for a few close seminar students who have had glimpses of a few applications of these methods. I do explain the W.D. Gann 'theory' of the market and you can then see how these methods fit right in with that theory but these are not the Gann method per se but derivatives of that theory and there is NO astrology in this book but some chart examples at the end to show you it's efficacy should you want to follow up along those lines. This book has a narrow purpose, that is get you to draw perfect charts, acquire perfect trendlines, obtain perfect time cycles for highs and lows, and extremely good and sometimes perfect final support and resistance targets. You do not need to be a rocket scientist to do this as in most cases updating your charts only takes 10-20 minutes a day. You will need a good computer and monitor and software that draws good charts with the traditional tools like trendlines, circles, retracement levels and perhaps cycle expanders or cycle finder tools. 99% of all the software I see out there has these things.

### **Is This Material In The Other Jenkins' Books?**

If you have read ALL eleven of my prior books and courses over the 30 years they came out, you probably have seen 40% of what's in here, but you have never seen the critical Octave theories and Vector methods that alone are worth ten times the price of this book. You also have never seen it all put together in one step by step book that teaches you how to trade day by day. You will have to WORK and work a lot, since your broker and friends can't help you as they have never seen anything like this in their lives. If you seriously want to become independent financially through trading in the markets then this book is for you and you can master it in a few weeks to a month if you put the effort in. If you follow the rules laid out you should become quite successful as a trader making your sole living from the market. For those of you who have bought my books in the past and know them to be of great value, then I can say without reservation that you will be happy

you have this one for your collection. It's also an ideal gift for your college child in providing them a means to be financially independent all their life.

The **cost of this book is \$525 US** and while some beginners may think that's a lot, you should eventually be making that much every single day as that is the goal of this book in a step by step fashion. After all, if you want to become a doctor what does that cost and how much time will it take? You'll make a lot more than a doctor does. I've saved you 50 years of massive experiments, failures, successes, and relationships with many of the great traders of the world and put this tremendous wisdom into a simple book for the masses. Knowledge like that doesn't come along every day!

You can **order thru [www.Paypal.com](http://www.Paypal.com)** and 'send money' to my email of **[mjenkins@stockcyclesforecast.com](mailto:mjenkins@stockcyclesforecast.com)**

I pay all postage anywhere, usually priority or express overseas. Be sure and include a complete mailing address at Paypal or follow up with a separate email with your address to me.

If you need to mail a check (US funds) it goes to: Stock Cycles Forecast, PO BOX 568561, Orlando, FL 32856-8561
